The application has been amended as follows:

On page 1 of the Specification: In line 5 –now Patent Number 6,672,992 ,-- has been inserted after “2002”.

: In line 6 –now Patent Number 6,719,666 ,-- has been inserted after “2003”.

1.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to show or teach applicant's claimed exercise apparatus comprising a support frame with a base and front support; a crank assembly having a pair of crank members; two swing units each having a lever pivotally mounted on the front support and a longitudinal connecting unit connected to a respective crank member and to a respective lever; two pedal assemblies each having a rocking arm, a pedal axle interconnecting the rocking arm to a sliding engagement with the connecting unit; the rocking arms having pivot ends pivotally mounted to the front support; whereby the pedal assemblies are connected to the swing units for swinging synchronously with the swing units. The pedal assemblies are considered to be connected to the levers and not to the connecting units because the connecting units have already been claimed as interacting with the pedal axle in a sliding manner. In claim 11, an adjustment unit adjusts the swinging amplitude of the pedal assemblies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
